Personal Portrait & Goal

A highly experienced and adaptable website and multimedia specialist with over 25 years in digital design and development. A natural problem solver who enjoys tackling both technical challenges and creative puzzles. Always striving to deliver thoughtful, effective solutions that meet each client's unique needs.

Work covering everything from the graphic design and video production to fully bespoke websites. I have developed a wide-ranging skillset with deep knowledge across many areas, allowing me to approach projects with flexibility, creativity, and a practical mindset.

As a lifelong traveller and curious explorer, I draw inspiration from cultures and communities across the world. This global perspective continues to shape my work and keep my thinking fresh.

Hobbies & Interests
<p>I have a strong passion for being creative with technology since a young age, focused in the areas of graphics, 3D rendering, video, animation, websites, and creative coding. I'm always exploring new tools and techniques, often blending technical skills with artistic expression through various multimedia projects.</p> <p>Outside the digital realm, I enjoy exploring the outdoors - whether wandering through forests, visiting ancient sites, or discovering off-the-beaten-track locations. These experiences fuel my creativity and give me space to think, reflect, and find inspiration for new ideas.</p> <p>In my downtime, I enjoy sci-fi, comedy, and documentaries, and occasionally dive into a good computer game for some immersive escapism. Music is another big part of my life; I enjoy a wide range of genres and often attend music festivals, which offer not just incredible live performances but a chance to connect with like-minded people from all walks of life.</p>
